

PHYSICAL EDUCATION DEPARTMENT

SA. 5. ORIENTEERING

“WHO IS THE TRAVELLER?”

Something unusual has happened at IES Dama de Marfil.

Early this morning, the school office received an official email from an international educational space agency. As part of a scientific and educational cooperation project promoted by an initiative launched by President Donald Trump, one member of our school community has been selected to take part in a mission to the Moon.

The school principal, Elisa Muñoz, received a confidential dossier containing the name of the chosen candidate. She was about to announce the news during an urgent meeting with the Guidance Department and the management team when, just before entering her office... the document disappeared.

There is no paper copy. The digital file has also been deleted.

The orienteering map below will guide you to the clues that will help you discover who the selected person is. But be careful! There may be American spies hiding around the school.

STUDENT(S): _____

CLASS: _____

Place the four cardinal points on the map (N, S, E and W) and find the eight clues.

DRAW THE CLUES YOU FIND:

SOLUTION:

WHO IS THE FUTURE ASTRONAUT? _____

GOOD LUCK! 😊
